

FALMOUTH AND TRURO PORT HEALTH AUTHORITY

Mr. G. H. D. L. M. M.A.R. and Certifying.

I have the honour of enclosing my annual report which I have great pleasure in presenting. This year is well up with regard to presentation of final annual report for 1965. I must thank you for your kind regards, because I have nothing to do with being your Port Medical Officer of Health.

The report is made in accordance with the regulations of the Ministry of Health.

From the Port Medical Report nothing of a serious nature has occurred. There was one case of contagious disease. A case of "Open" Pulmonary Tuberculosis was found in an Asylum woman on the 2nd August and she is now under treatment.

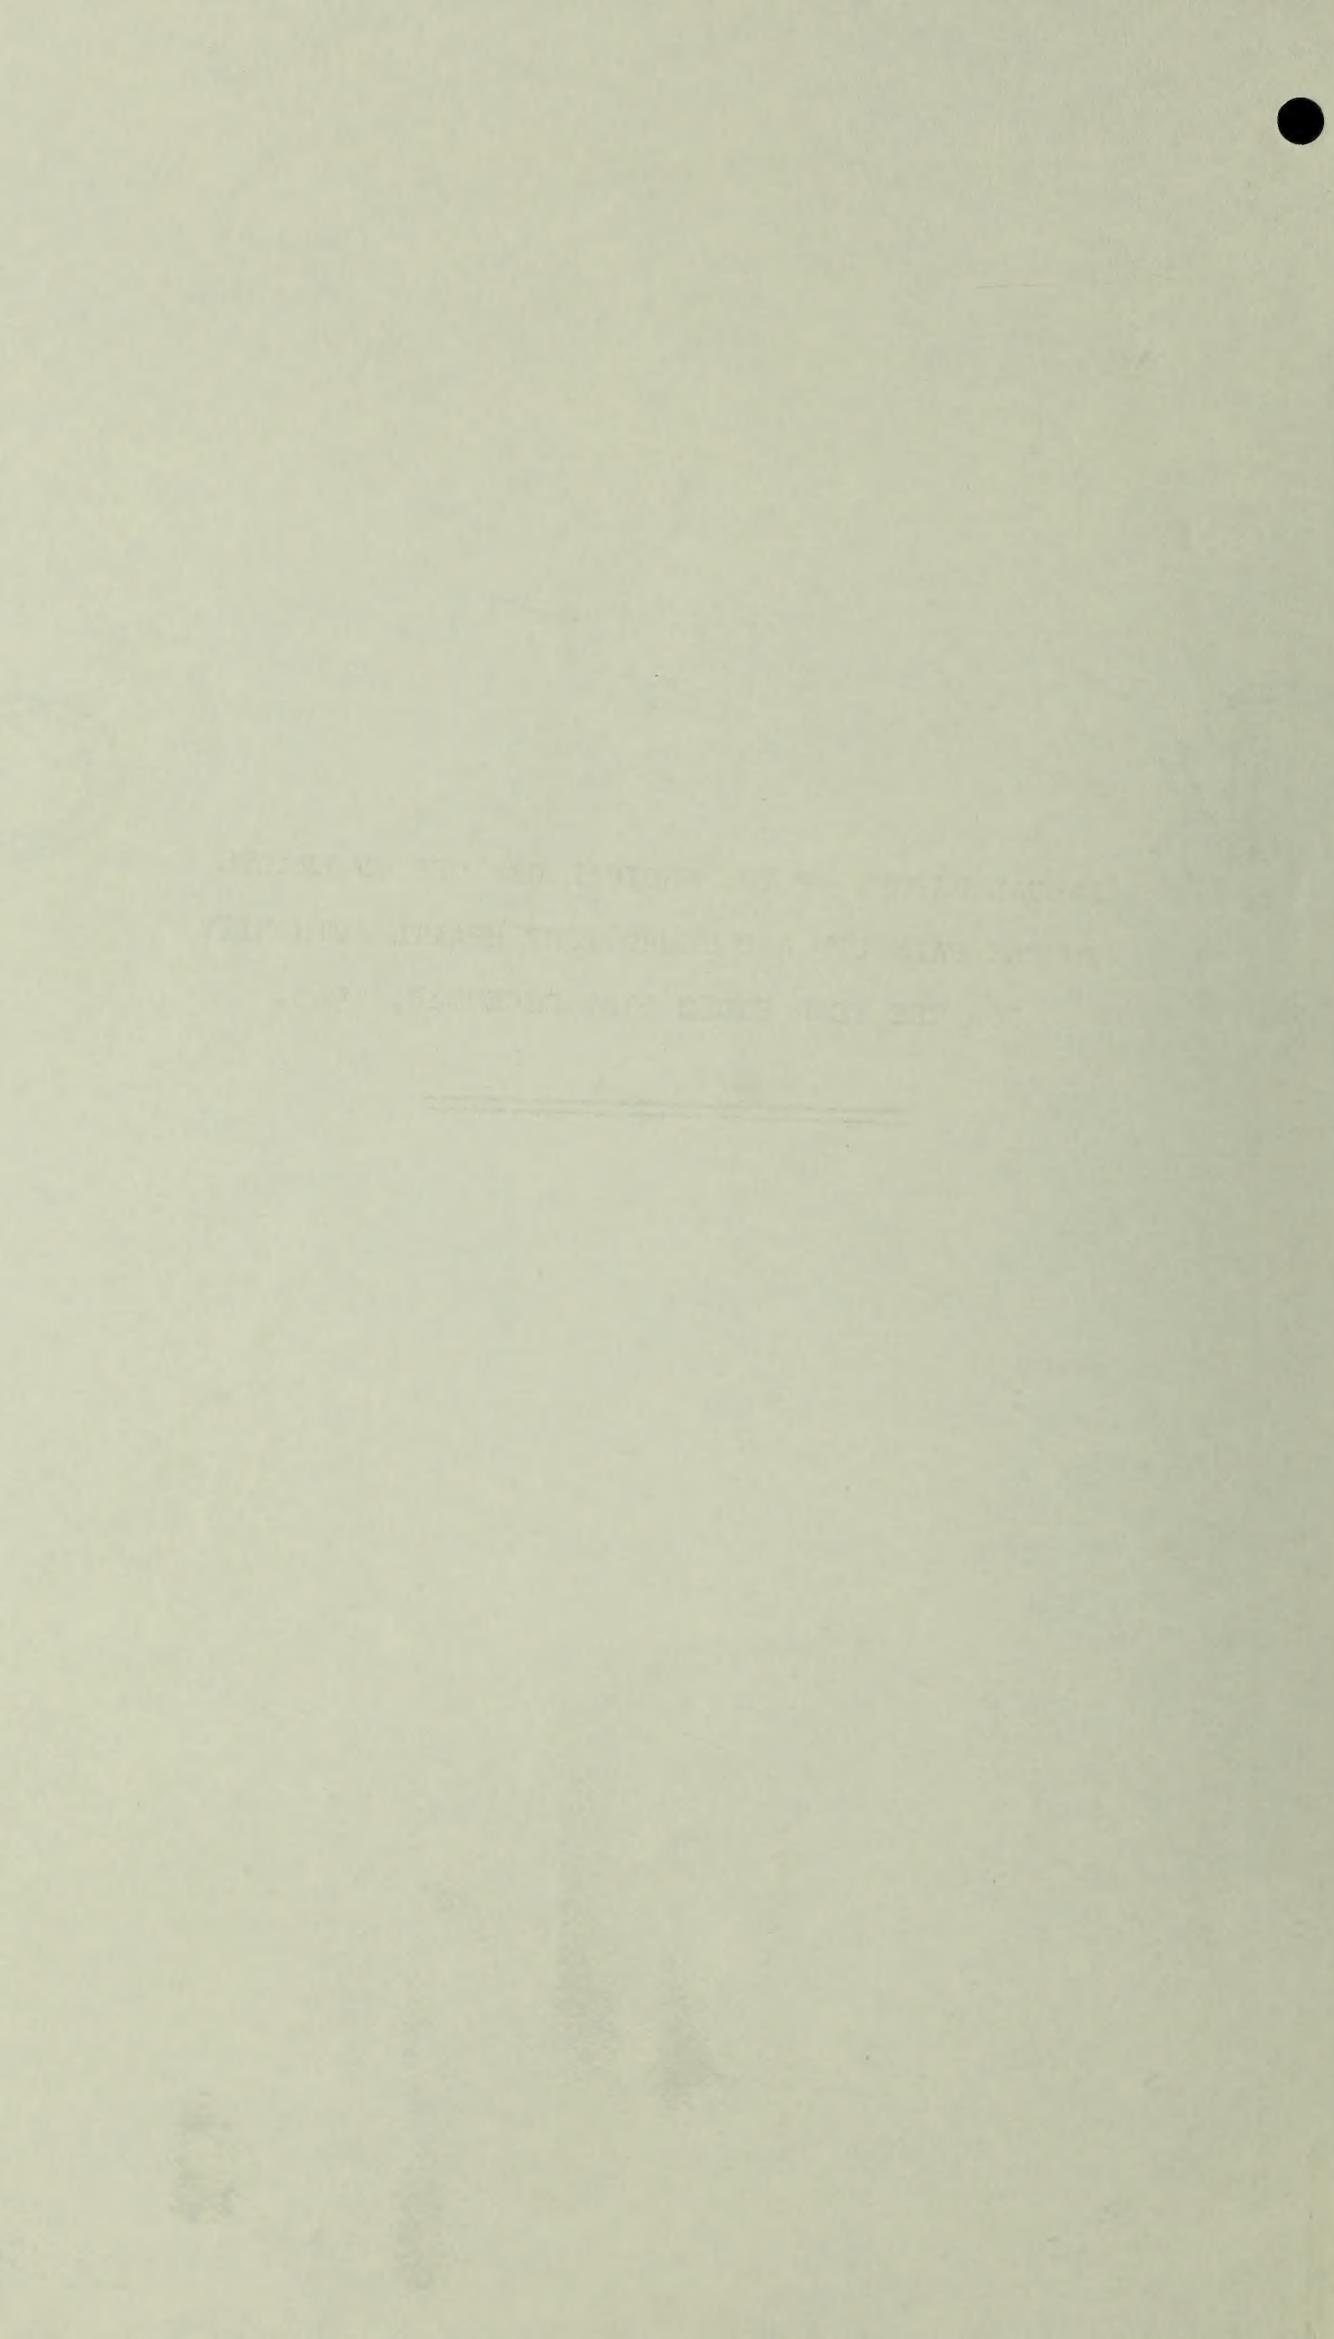

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH

TO THE FALMOUTH AND TRURO PORT HEALTH AUTHORITY  
FOR THE YEAR ENDED 31st DECEMBER, 1965.

The Chairman \_\_\_\_\_ of the Board, and others, all necessary information and reports were furnished as was requested. I received a letter of appreciation from the new Assistant Medical Officer who explained their people had not been sent out owing to the sudden death of the previous.

During the year I have boarded 37 vessels so abroad and land for treatment in Hospital with and without pay - 36 cases 37 all. These are as follows -

1965	Jan.	NAME & NATIONALITY	SEX	AGE	DISPOSITION
	15	MARIE LOUISE	German	Female	Free.
	17	NETTIE STONEHORN	British	Female	3 months old - the child died.
	18	PAULINE DE JONKHEER	Dutch	Male	Free.
	22	ROSE JAY	Canadian	Female	Carried on board and
	24	T. GLENNIE	Norwegian	Male	Radio controlled.
June	27	BRITISH QUEEN	British	Female	Plaster cast.
	29	BUTTERFLY	British	Female	Covered with bandages.
	29	PAUL KIRK	Norwegian	Female	Free.
July	12	EDWARD	Australasian	Male	Carried on board.
	31	S.E. CHALMERS	British	Female	Free.
Aug.	4	KELLYIA	Yugoslav	Female	Plaster cast.
Sept.	6	G.J. MURKIN	Lebanese	Male	Free.
Oct.	20	ELAINE	Norwegian	Female	Plaster cast.
	27	MARIE LINDSTROM	German	Male	U.S.A. passenger - American.
Nov.	23	BRITISH SAILOR	British	Male	1 Crew - German.
	23	BRITISH ENGINEER	British	Male	1 Crew - British.
Dec.	3	M.W. HORN	British German	Male	1 Crew - East Anglia.

FALMOUTH & TRURO PORT HEALTH AUTHORITY

Mr. Chairman, Ladies and Gentlemen,

The usual beginning of my annual report was "I have great pleasure in presenting". This year it must be with regret in presenting my final annual report for 1965. I must admit it is with genuine regret, because I have enjoyed for 21 years being your Port Medical Officer of Health.

The report is made in accordance with the regulations of the Ministry of Health.

From the Port Medical aspect nothing of a serious nature has occurred. There was one case of notifiable disease. A case of "Open" Pulmonary Tuberculosis was found in an Asiatic seaman on the S.S.Dunera anchored at King Harry Ferry. He was admitted to Tehidy Hospital and has made satisfactory progress.

All the officers, and their families, and all other members of the crew were X-rayed at the Mobile clinic in Falmouth. All were given satisfactory clearances.

The Chief Medical Officer, Ministry of Health, was given all necessary information of this report last January before it was requested. I received a letter of appreciation from the new Assistant Medical Officer who explained that notifications had not been sent out owing to the sudden death of his predecessor.

During the year I have boarded 17 vessels to attend and land for treatment in Hospital sick and injured men - 22 cases in all. These are as follows -

1965

Jan.	15	MARIE LOUISE	German	2 crew.
	17	METHANE PIONEER	British	3 stretcher cases in abominable weather.
	18	FOKKE DE JONGH	Dutch	Sick Master.
	21	MOOSE JAN	Canadian-Pacific	Carpenter - crushed hand.
	31	T.SLEFOLKE	Norwegian	Radio Officer - Heart.
June	17	BRITISH QUEEN	British	Master - Heart.
	19	NOTTINGHAM	British	Crew - acute appendicitis.
	28	ANCO SEA	Norwegian	Crew - 2 dead.
July	12	BULLFINCH	Admiralty C/S	Crew - Pleurisy and Bronchitis.
	31	S.S.TALAMBA	British	3rd Mate - Sc.App. & Perit.
Aug.	4	KELLETIA	Dutch Shell	Master/C.Off. & 2 men.
Sept.	6	S.S.MOEMI	Lebonese	Stce.Chinese - Asthma.
Oct.	26	PELAGOS	Norwegian	Officer-Acute retention.
	27	MARIE LEONHARDT	German	U.S.A.Passenger - Hernia.
Nov.	23	BRITISH ENGINEER	British	1 Crew Dead - Coroner.
	23	BRITISH ENGINEER	British	1 Crew - Bronchitis.
Dec.	3	M.V.RHON	East German	1 Crew - Head injury.

17 Visits

22 Landed.

There was very little sickness, none of a serious nature in the Docks.

The number of Deratting Exemption Certificates was 18. Total certificates issued was 19.

No complaints of a serious nature were made by your Health Inspector, Mr.Jackett.

The following details are in tabulated form and represent the work carried out during the year on behalf of this Authority.

Finally may I once more express my appreciation of the help and co-operation of your Inspector, Mr.Jackett, and say how sorry I am to "Pack in before he has".

My thanks again to the Pilots, H.M.Customs Officers and all who helped me to carry out my work on your behalf.

I remain,

Mr.Chairman, Ladies and Gentlemen,

Your obedient Servant,

A. CECIL DICK

series to show some little stories  
was very little interest shown.  
The upper part of the book  
now has been written by Mr. Joseph H. T. S.  
and the lower part by Mr. George W. L. Jones.  
The book will be published in October.  
It will be a good one for children.  
I am sending you a copy of the  
book to keep for your library.

III. CHARACTER OF SHIPPING AND TRADE  
DURING THE YEAR

TABLE C

Passenger Traffic ....	(Number of passengers INWARDS Nil
	(Number of passengers OUTWARDS Nil
Cargo Traffic {	{ Principal IMPORTS General cargo, including food produce, coal, cement, timber, oil and petroleum spirit.
	{ Principal EXPORTS None.

PRINCIPAL PORTS from which ships arrive :-

Amsterdam, Antwerp, Curacao, Cherbourg, Dieppe, Gibraltar,  
Hampton Roads, Halifax N.S., Hamburg, Oslo, Rotterdam,  
Rouen, Stockholm.

Approximately 75% of vessels arrive from  
Scandinavian, Continental and United Kingdom Ports  
for dry docking after discharging cargo abroad.

IV. INLAND BARGE TRAFFIC

There is no Barge traffic in the Port.

V. WATER SUPPLY

Source of supply

(a) The district - The drinking water of the district is obtained from the Falmouth Corporation's reservoirs in the Parishes of Budock and Mabe.

(b) Shipping - As for the district. Water from the district supply is available alongside and is delivered to shipping afloat.

Reports of tests for contamination

Samples are taken regularly by the Falmouth Corporation and tested by the Public Analyst.

Precautions taken against contamination of hydrants and hosepipes

The Authority have no jurisdiction over shore premises or equipment.

Vessels are supplied with fresh water from the Falmouth Corporation's Water-boat and from hydrants on the quayside.

Hydrants and hosepipes are thoroughly flushed out before water is discharged into the water-boat or into ships' water storage tanks.

Number and Sanitary Condition of Water-boats, and powers of Control by the Authority

There is one water-boat operating in the Port. This is owned by the Falmouth Corporation, is of modern construction and is in excellent sanitary condition. The vessel is periodically inspected. Control of the water-boat in so far as any statutory nuisance might exist thereon would be dealt with under Part III of the Public Health Act, 1936, which has been applied to the Joint Board.

VI. PUBLIC HEALTH (SHIPS) REGULATIONS, 1952 to 1963

List of Infected Areas

The list of infected areas is prepared from information supplied by the World Health Organisation in the Weekly Record of Quarantinable Diseases.

The lists are typed and copies supplied by hand to H.M. Customs Waterguard, H.M. Immigration Officer and the Pilots.

Whenever areas are removed from the list those concerned are notified of the deletions which should be made. In the event of further infected areas being added, a completely new list of infected areas is supplied.

Radio Messages

The Port is not a radio transmitting port. Radio telegrams from Masters of vessels are received principally from the Land's End Radio Station.

Notification otherwise than by radio

Information about ships which require the attention of the Port Medical Officer is telephoned by H.M. Customs Waterguard Officers to the Port Medical Officer.

Mooring Stations

A mooring station has been established in the Dock area alongside No. 7 Wharf and outside the Dock area alongside a buoy at St. Just Pool.

Hospital Accommodation for Infectious Diseases

All cases of infectious diseases, other than smallpox, can be admitted to the County Isolation Hospital at Truro.

Surveillance and follow up of contacts

Notices are sent to Medical Officers of the Districts concerned when contacts leave the Port. Prepaid Reply Cards are issued in certain cases in which contacts are required to

notify any further changes of address. Contacts remaining within the Port District are under the supervision of the Port Medical Officer during the period of surveillance.

Cleansing and disinfection of ships, persons, clothing and other articles

All ships' quarters which have been occupied by cases or suspected cases of infectious disease are disinfected by the Port Health Inspector.

The disinfection of persons, clothing and other articles is carried out at the County Isolation Hospital at Truro.

VII. SMALLPOX

All cases or suspected cases of smallpox may be sent to Smallpox Isolation Hospital, Nr.Liskeard, Cornwall.

Ambulances for the transport of such cases would be supplied by the Cornwall County Council who are also responsible for the vaccinal state of the ambulance crew.

The Smallpox consultant available is for the whole area South Western Region -

Dr.W.H.St.John-Brooke,  
West Cornwall Hospital,  
Penzance.

Telephone Penzance 2382.

(Home) Cockwells 356.

Specimens for laboratory diagnosis would be sent to The Central Public Health Laboratory, Colindale Avenue, London, N.W.9. (Telephone Colindale 7041).

VIII. VENEREAL DISEASE

Cases of Venereal Disease are treated at the Falmouth and District Hospital and the Royal Cornwall Hospital (City) at Truro by Dr.E.R.Hargreaves, the County Venerealogist. Clinics are held as follows -

Falmouth - Saturday ..... 10 a.m. to 12 Noon.

Truro - Wednesday ..... 2 - 3.30 p.m.

IX. CASES OF NOTIFIABLE AND OTHER INFECTIOUS DISEASES ON SHIPS

TABLE D

Category	Disease	Number of cases during the year		Number of ships concerned
		Passengers	Crew	
Cases landed from ships from foreign ports	-	-	-	-
Cases which have occurred on ships from foreign ports but have been disposed of before arrival	-	-	-	-
Cases landed from other ships	Pulmonary Tuberculosis	-	1	1

X. OBSERVATIONS ON THE OCCURRENCE OF MALARIA IN SHIPS

No case of Malaria has been observed during the past year.

XI. MEASURES TAKEN AGAINST SHIPS INFECTED WITH OR SUSPECTED FOR PLAGUE

No ships infected with or suspected for plague have arrived during the past year.

XII. MEASURES AGAINST RODENTS IN SHIPS FROM FOREIGN PORTS

(1) Procedure for inspection of ships for rats

Vessels are boarded by the Port Health Inspector as soon as possible after arrival, and unless the Masters produce recently issued certificates, inspections are extended to the holds, etc. in order to ascertain the rat population. Where indications of rat infestation are found traps are set and poison baits are laid, and in cases where the deratting certificate has expired and indications of rodent infestation are found, the vessel is ordered to be fumigated.

(2) Arrangements for the Bacteriological or Pathological Examination of Rodents

Arrangements have been made for the bacteriological and pathological examination of rodents at the Royal City Hospital,

Pathological Department, Truro.

No rodents have been sent for examination during the year.

(3) Arrangements for deratting ships and methods used

Deratting of ships is normally carried out entirely by fumigation by hydrogen cyanide. The work is carried out by a commercial contractor, Fumigation Services Ltd. of London.

(4) Progress in the rat-proofing of ships

Vessels are found to be largely rat-proof. No additional rat-proofing was provided on vessels at the Port during the year.

TABLE E  
RODENTS DESTROYED DURING THE  
YEAR IN SHIPS FROM FOREIGN  
PORTS

Category	Number
Black rats	-
Brown rats	-
Sent for examination	-
Infected with plague	-

Re-visits	1,116	-	-	-
Total	1,861	-	28	-

XIV. PUBLIC HEALTH (SHELL-FISH)  
REGULATIONS 1934 and 1948

Samples of Oysters were obtained from the main suppliers to the Market, namely :-

Messrs.Helford Oyster Fisheries.  
Messrs.H.Johns, Flushing.  
Messrs.Gunn, Coombe, Truro.  
Mrs.Baker, Coombe, Truro.  
Mr.F.F.Vinnicombe, Mylor, Falmouth.

These were examined by the Public Health Pathologist, Royal Cornwall Infirmary and were pronounced very clean and fit for human consumption.

XV. MEDICAL INSPECTION OF ALIENS & IMMIGANTS

Medical Inspectors of Aliens and Immigrants holding  
Warrants of Appointment

Dr.Albert Cecil Dick, Port Medical Officer of Health.

Other Staff

None.

Organisation of Work and Nature and Amount of Alien Traffic

Falmouth is an approved Port under the Aliens Order for the landing of aliens but there is little or no aliens traffic in the Port. In the event, however, of aliens arriving arrangements would be made for medical inspection to be carried out on board. It has not been thought necessary to make any special arrangements for providing accommodation for medical inspection and examination ashore.

## XVI. MISCELLANEOUS

No case of death on board ship from infectious disease has occurred for many years, but in the event of such death the Authority would endeavour to secure cremation. The nearest Crematorium is at Truro.

FALMOUTH & TRURO PORT HEALTH AUTHORITY

Mr. Chairman, Ladies and Gentlemen,

I beg to submit my report for the year 1965.

SHIP INSPECTION

During the year 745 vessels were inspected and 28 of them were found to have nuisances or defects on board. Verbal and informal notices were given and as a result all the nuisances and defects were remedied. 1,861 re-visits were made to vessels in connection with these nuisances and defects and rat destruction and vessels from infected areas.

As shown in Table B 206 ships from Foreign Ports were inspected and 539 ships from Coastwise Ports, making the total of 745.

Nuisances and Defects

These consisted mainly of structural defects caused through wear and tear, defective heating apparatus, dirty, foul and defective water closets and fittings and bathrooms, choked scuppers, dirty clothes lockers, and messrooms.

Dirt, Vermin and other conditions prejudicial to health

This type of nuisance and other conditions prejudicial to health are now rare. The number of vessels dealt with during the year on account of these conditions of the crew's quarters is becoming much less than in previous years.

The disinfection of verminous vessels is carried out by the pressure spraying of liquid insecticides. During the year 17 vessels were dealt with.

CLEAN AIR ACT, 1956

The Dark Smoke (Permitted Periods) (Vessels) Regulations,  
1958

The attention of the Masters and Engineers of vessels arriving at the Port is directed to the requirements of the Regulations.

The minimum times for observing smoke emissions vary for 30 minutes (black smoke) to 2 hours (dark smoke) and in order to implement the main purpose of the Act, visits are made to the vessels when any dark smoke is being emitted and representation made to the Officer-in-Charge. He is informed that observations is being kept and requested to make every effort to reduce the emission.

During the year 43 observations were made of smoke emissions from 23 British Ships, and 20 from foreign ships. In each case the emission was within the prescribed limits and the intensity reduced following my visit.

#### RAT DESTRUCTION

The sheds, quays and wharves are periodically visited and inspected and immediate measures are taken when fresh evidence of rats or their presence is reported. Poison baits are laid by the Docks Rodent Officer.

#### THE PREVENTION OF DAMAGE BY PESTS (APPLICATION TO SHIPPING) ORDER, 1951, AND AMENDMENT NO. 2 ORDER, 1956

In addition to the functions they exercise, in common with other local authorities, Port Health Authorities are empowered to issue Rodent Control Certificates. The purpose of these certificates is to relieve Authorities from the necessity of inspecting coastwise vessels which are known to be free or to have been recently freed from rats and mice and the period of validity has been limited to four months.

Since the Amendment No. 2 Order came into operation authorising a charge for these Certificates, most of the vessels have preferred to pay the slight additional cost and obtain International Certificates. No certificates were issued during 1965.

#### FOOD INSPECTION FOOD AND DRUGS ACT, 1955 THE PUBLIC HEALTH (IMPORTED FOOD) REGULATIONS, 1937 AND 1948 PRESERVATIVES IN FOOD REGULATIONS, 1962

No imported food-stuffs are discharged within the Port Health District. No action necessary.

#### THE PUBLIC HEALTH (IMPORTED MILK REGULATIONS), 1926

No action necessary.

#### THE PUBLIC HEALTH (SHELL-FISH) REGULATIONS, 1934 AND 1948

There are five oyster beds in the district all separately owned. Samples of oysters have been taken from all of them and submitted for bacteriological examination and all were found to be 100% pure.

I am, Ladies and Gentlemen,

Your obedient Servant,

FRANK JACKETT

Port Health Inspector
